

MDxhealth Enters into Distribution Agreement with Unilabs for SelectMDx for Prostate Cancer

IRVINE, CA, and HERSTAL, BELGIUM – 07:00 CEST, October 30, 2017 – MDxHealth SA (Euronext: MDXH.BR) today announced that the company has entered into an agency service agreement for SelectMDx® with Swiss-based Unilabs, one of Europe's leading providers of clinical laboratory testing and medical diagnostic imaging services.

Under the terms of the agreement, Unilabs medical laboratory in Geneva Switzerland, will perform SelectMDx service testing for all its clinical labs in France, Portugal, Sweden, Norway, Denmark, Finland, UK, Italy and Switzerland. To offer this service through its network, the laboratory will purchase SelectMDx CE-marked IVD kits from MDxHealth.

"We are excited that Unilabs is going to offer SelectMDx service testing to their customers," **said Dr. Jan Groen, CEO, MDxHealth.** "The company's broad hospital network and commercial capabilities will significantly contribute to the successful market penetration of SelectMDx."

"We are delighted to offer SelectMDx to Unilabs customers," **commented Dr Pierre-Alain Menoud, Head of Molecular Diagnostics at Unilabs, Switzerland.** "This agreement with MDxHealth reinforces our commitment to providing urologists with a service test."

About SelectMDx for Prostate Cancer

Of the nearly 2 million prostate biopsies performed each year, less than a third find cancer. Most of these men could have avoided a painful and invasive prostate biopsy procedure, with its associated complications and costs. SelectMDx for Prostate Cancer is a proprietary urine-based, molecular diagnostic test that offers a non-invasive 'liquid biopsy' method to assess a man's risk for prostate cancer. SelectMDx helps identify men at increased risk of harboring aggressive, potentially lethal, prostate cancer who may benefit most from a prostate biopsy and earlier detection. The test delivers a negative predictive value (NPV) of 98% for clinically significant disease, helping to reduce the need for MRI procedures and invasive prostate biopsies by up to 50%, thereby reducing healthcare costs.

About MDxHealth

MDxHealth is a multinational healthcare company that provides actionable molecular diagnostic information to personalize the diagnosis and treatment of cancer. The company's tests are based on proprietary genetic, epigenetic (methylation) and other molecular technologies and assist physicians with the diagnosis of urologic cancers, prognosis of recurrence risk, and prediction of response to a specific therapy. The Company's European headquarters are in Herstal, Belgium, with laboratory operations in Nijmegen, The Netherlands, and US headquarters and laboratory operations based in Irvine, California.
