

MDxHealth Signs Agreement with Stratose® to Expand Insurance Coverage for ConfirmMDx™ for Prostate Cancer Test

IRVINE, CA, and HERSTAL, BELGIUM — September 3, 2013 - MDxHealth SA (NYSE Euronext: MDXH), a leading molecular diagnostic company that develops and commercializes epigenetic tests to support the diagnosis and treatment of cancer patients, today announced that it has entered into an agreement with Stratose, one of the largest healthcare PPO network providers in the U.S. The agreement provides Stratose's 12.4 million member network with access to ConfirmMDx for Prostate Cancer testing.

ConfirmMDx for Prostate Cancer provides urologists and their patients with a non-invasive approach to address false-negative biopsy concerns. The test provides urologists with actionable information on the decision for repeat biopsy, aiding in the stratification of patients at sufficiently low risk who may avoid repeat biopsy and return to screening, from those who may be at increased risk for harboring undetected cancer, meriting repeat biopsy and potentially treatment.

"MDxHealth continues to work with payers and specialty networks to expand patient and customer access to the ConfirmMDx for Prostate Cancer test. Stratose's network supplements more than 90 different third-party insurance payers. Since 70% of all MDxHealth ConfirmMDx cases are billed to commercial and third-party payers, these contracts are very important," said Dr. Jan Groen, CEO of MDxHealth. "With the addition of Stratose to our existing payer agreements, more than 80 million covered lives now have access to ConfirmMDx for Prostate Cancer."

Stratose (formerly operating as Coalition America, NPPN, OPPN, PlanCare America, 4MOST Health, Qualident and KeyClaims) works to reduce the cost and ensure the best financial results on every medical, dental and workers' compensation claim for any claims payer. The company maintains one of the largest directly managed PPO networks in the U.S., including more than 850,000 direct and affiliate medical, dental and workers' compensation provider contracts.

About MDxHealth®

MDxHealth is a molecular diagnostics company that develops and commercializes advanced epigenetic tests for cancer assessment and the personalized treatment of patients. The company's first commercial product, ConfirmMDx™ for Prostate Cancer, has been shown to help distinguish patients who have a true-negative biopsy from those who may have undetected cancer. MDxHealth helps to address a large and growing unmet medical need for better cancer diagnosis and treatment information. The company has a proprietary platform and a strong epigenetic product pipeline focused on the development of

products for prostate, brain and lung cancers. The company is based in Irvine, California with a European headquarters in Herstal, Belgium. For more information visit MDxHealth's website at www.mdxhealth.com.
