

MDxHealth Signs Agreement with Lab21 to Make SelectMDx Liquid Biopsy Test Available in the United Kingdom

IRVINE, CA, and HERSTAL, BELGIUM – March 21, 2017 – MDxHealth SA (Euronext: MDXH.BR), today announced that it has signed a distribution agreement to make its SelectMDx™ for Prostate Cancer test available to Lab21 Clinical Laboratory's urology clients in the United Kingdom.

Under the terms of the agreement, Lab21 will serve as a non-exclusive distributor for SelectMDx in the United Kingdom. Liquid biopsy samples will be tested in MDxHealth's state-of-the-art clinical diagnostic laboratory in Nijmegen, The Netherlands. Lab21 will reimburse MDxHealth for all testing services performed.

"In the UK, about 40,000 men a year undergo an unnecessary prostate biopsy and risk its associated complications," said Dr. Jan Groen CEO of MDxHealth. "Lab21 is the ideal partner to bring SelectMDx to UK physicians and patients for the first time, helping to improve both the quality of care and outcomes for those suspected of harboring prostate cancer."

"We are delighted to announce our first distribution agreement with MDxHealth," said Graham Mullis, CEO of Lab21. "We expect the combination of Lab21's distribution network and MDxHealth's non-invasive diagnostic test to significantly improve the quality of prostate cancer diagnosis in the UK."

About SelectMDx for Prostate Cancer

Of the more than 2 million prostate biopsies performed each year in the US and Europe, less than a third find cancer. Most of these men could have avoided a painful and invasive prostate biopsy procedure, with its associated complications and costs. SelectMDx for Prostate Cancer is a proprietary urine-based, molecular diagnostic test that offers a non-invasive 'liquid biopsy' method to assess a man's risk for prostate cancer. SelectMDx helps identify men at increased risk of harboring aggressive, potentially lethal, prostate cancer who may benefit most from a prostate biopsy and earlier detection. The test delivers a negative predictive value (NPV) of 98% for clinically significant disease, helping to reduce unnecessary MRI procedures and invasive prostate biopsies by approximately 50%, thereby reducing healthcare costs.

About Lab21

Lab21 Clinical Laboratory is part of the Novacyt Group of Companies and supports healthcare providers and the pharmaceutical and biotechnology industries with technically advanced testing services from its accredited facilities in Cambridge, UK. The Lab 21 team's experience and know-how is coupled with a rapidly growing portfolio of molecular and viral diagnostics, plus next generation sequencing, pharmacogenetic and patient profiling tests, which all use cutting-edge technology. This unique combination adds value to pharmaceutical, diagnostic and biotech partners – and directly to clinicians or healthcare providers as they treat and monitor their patients.
